

## **GBook Extension - Version 1.0**

This extension is a nice PHP guestbook where your visitors can post comments about your website. It comes with strong anti-SPAM protection, IP banning, smileys, entry notification via e-mail and more.

This extension was created with Extension Builder 1.00 and is based on GBook 1.6 by Klemen Stirn. You will find much more details here:

<http://www.phpjunkyard.com/php-guestbook-script.php>

### ***Properties***

A detailed description of all properties can be found in the readme.htm file.

Most settings can be changed through the Properties window so there is no need to manually edit any files!

### ***Extra instructions***

1. Upload 'entries.txt' and 'banned\_ip.txt' to your web server (to the same folder as where you plan to published the guestbook).
2. Change the permissions of both files to 777 (write access).

You only have to do this once!

### ***Requirements***

WYSIWYG Web Builder 5.5 or higher.

PHP 4.3.x or higher.

FTP access and a FTP program to upload the storage files.
