WBX Converter

This utility converts .wbx extensions created with Extensions Builder to .uwbx format, so that they can be loaded by the UNICODE version of WYSIWYG Web Builder 7 and 8.

> **Note:**
> This utility only works for extensions created with Extension Builder!

Step 1
Click 'Add' to add one or more extensions.
Click 'Remove' to remove the selected file from the list.
Click 'Remove All' to remove all items from the list.

Step 2
Click 'Convert' to convert the extensions to unicode.

Step 3
A new file with the file extension '.uwbx' will be generated in the same folder as the original.
